

THE GOOD LADY

Synthesis Conveyor Ovens Features

Superior Design & Construction

1. 100mm high cooking chamber
2. Working temperature reached in 20 minutes via BRP power regulation system .
3. Constructed entirely in stainless steel.
4. Double glazed full width inspection door.
5. Easy access for cleaning and disassembly.
6. Cooling system for external parts that can be touched
7. Castors with brakes.
8. The Quiet One - Highly effective silencing of conveyer and ventilation systems.
9. Conveyor belt with variable speed down to a complete halt
10. Balanced temperature detection

Advanced Impingement

The maximum temperature of 320°C is more than sufficient to get perfect results, thanks to the patented ventilation system. Jets of hot air are perfectly tuned to wrap the product completely as it moves along the wire mesh conveyer giving an evenly cooked result time after time. This system is proven to cook at a lower temperature and using significantly less energy.

Stackable

All Synthesis ovens are stackable so you can step up your productivity to meet peak demand or bake different products with different times. When you don't need to produce much, you can save on energy by using just one baking module.

Intuitive Control Panel

Electric

Gas

Constant display of:

- ♦ Temperature (balanced temperature detection from 2 probes). On the electric version the intensity of the top and bottom elements can be adjusted according to the customer requirements without changing the chamber temperature.
- ♦ Baking time – heating element ignition (electrical model) or flame ignition (gas models)
- ♦ Economy function (if activated).

Functions:

- ♦ Management of 6 cooking programs. For each program you can set: cooking time, temperature and power to the top and the bottom of the oven.
- ♦ ECONOMY function: keeps the oven at a lower temperature if the oven doesn't need to be operated at full working temperature. Save money and energy.
- ♦ Timer for programmed start. Digital clock, self-diagnostic with display of error message. Backlit LCD.
- ♦ Multi-lingual programming.
